Summary

Experience:
I have 14+ years of total experience and more than 10 years experience in web application development, during this journey I have developed mostly web applications like Accounting, payroll, hr, sales, inventory, warehouse, procurement, schedule, event, student management system, E-commerce, bulk SMS send software for SMS gateways, restaurant deals, payment gateway integration etc.

Skills:
I was started my career as a programmer at Globe Pharmaceuticals company, there I have developed sales & inventory management system, alongside me none a programmer was there, every thing I have do alone and successfully done sales and inventory software, as a fresh graduate it was difficult for me, but that skill boost up my confidence, Technology I used Oracle database 8i, developer 6i, because before joining that job along side my graduation I have completed OCP certification from Oracle university in 2003. AS web application developer I have passed more than 10 years, as a web application developer I have experience working on php, html, css3, bootstrap, jquery, vuejs, vanilla javascript, ES6, nodejs, git, Laravel, zend, codeigniter, cakephp, symfony etc.

But now my primary php framework is Laravel.

Career highlights:
Some of my notable projects are "Grubdealz restaurant service" https://grubdealz.com
Technology: Laravel, html, bootstrap 4, jquery, facbook sdk, google sdk, REST API OAuth2 passport

"Online feriwala" https://onlineferiwala.com
Technology: Laravel, html, bootstrap 4, vuejs, vanilla Js, Jquery

"Bulk SMS send application" for SMS gateways https://login.smsinbd.com/
Technology: Laravel, html, bootstrap 3, jquery, vanilla Js

"ERP solution for SAIC" etc.
Technology: Raw PHP, html, bootstrap 3, jquery, vanilla js

"ORWA members & event management system"
Technology: zend 1, html, bootstrap 3, jquery, vanilla Js etc.
